

# Santa Cruz County Used Motor Oil and Filter Recycling Program

## Don't Dump Used Oil and Oil Filters

- Used motor oil is hazardous to you, your children and our environment. Do not dump used oil down gutters, storm drains, in garbage cans, or into our creeks, rivers, or the bay. The oil from one oil change can pollute 1,000,000 gallons of water.
- Recycle your used oil filters. They can contain more than 45% used oil in weight when removed from the vehicle. Recycling all filters sold annually in the US would recover 160,000 tons of steel and prevent millions of gallons of oil from polluting the environment.
- Recycling used oil & oil filters prevents water pollution, protects public health, and preserves limited natural resources.

**These locations will accept uncontaminated used motor oil and oil filters from residents during their normal business hours.**  
**Please give them a call for more information**
